Siming Qi

San Diego, CA | (858) 899-5178 | siming.qi0122@gmail.com | github.com/QSiming

EDUCATION

University of California, San Diego Expected June 2027
Bachelor of Science in Data Science

PROJECTS

Recipe Rating Analysis Personal Project
Python, Jupyter Notebook, GitHub Pages qsiming.github.io/recipe-rating-analysis/

- Analyzed 83,782 recipes and 731,927 user interactions using exploratory analysis, permutation tests, and hypothesis testing to determine how recipe characteristics relate to user ratings.
- Cleaned and merged recipe and interaction data; treated invalid zero ratings as missing, created missingness indicators, converted dates, and removed extreme cooking-time outliers.
- Built and compared Linear Regression and Ridge Regression models using cooking time, steps, ingredients, submission date, and tags; evaluated performance with RMSE and R-squared.

Persuasive and Deceptive Data Visualization Team Project
Data Visualization, Statistical Analysis, HTML, GitHub Pages qsiming.github.io/Proposition-Visualization/

- Analyzed police misconduct outcomes to compare substantiation rates across allegation categories and over time.
- Designed paired visualizations showing how filtering, denominators, color, and counts versus percentages can change the interpretation of the same data.
- Created the supporting visualization and calculated category-level and annual substantiation rates, identifying Force as the lowest-rate category.

WORK EXPERIENCE

The McMillan Law Firm, APC December 2024 - October 2025
Part-Time Legal Assistant

- Queried, cleaned, and validated case, billing, and administrative records using SQL and spreadsheet tools; checked missing, duplicate, and inconsistent entries before reporting.
- Conducted legal and factual research by gathering case documents, statutes, and supporting materials, then prepared concise evidence summaries for attorney review.

SKILLS

Programming: Python, SQL, R, HTML, JavaScript
Libraries: pandas, NumPy, scikit-learn, Matplotlib
Data Analysis: Data cleaning, exploratory data analysis, statistical analysis, hypothesis testing, permutation testing, regression modeling, data visualization
Tools: Jupyter Notebook, GitHub, GitHub Pages, VS Code, Microsoft Excel, RStudio, PostgreSQL

RELEVANT COURSEWORK

Data Management; Learning Algorithms; Data Visualization; Regression and Statistical Modeling

LANGUAGES

English, Mandarin Chinese
